INTRODUCTORY SECTION

OUR MISSION

To provide quality health insurance to eligible children and to strive for a health care system in which all West Virginia children have access to health care coverage.

West Virginia Children's Health Insurance Program 1900 Kanawha Boulevard East Building 3, Room 554 Charleston, WV 25305 304-558-2732 voice / 304-558-2741 fax Helpline 877-982-2447 www.wvchip.org

December 1, 2003

Honorable Bob Wise, Governor State of West Virginia

Honorable Members of the West Virginia Legislature

Board Members West Virginia Children's Health Insurance Program

Tom Susman, Acting Secretary West Virginia Department of Administration

Sharon L. Carte, Executive Director West Virginia Children's Health Insurance Program

Ladies and Gentlemen:

It is a privilege to submit to you the Annual Report of the West Virginia Children's Health Insurance Program (WVCHIP) for the fiscal year ended June 30, 2003. This report was prepared by the Office of the Financial Officer of WVCHIP. Responsibility for both the accuracy of the data presented and the completeness and fairness of the presentation, including all disclosures, rests with the management of WVCHIP. We believe the data, as presented, is accurate in all material respects and is presented in a manner designed to present fairly the financial position and results of operations of WVCHIP. All disclosures necessary to enable the reader to gain an understanding of WVCHIP's financial activities have been included. It should be noted that these financial reports are unaudited and for management purposes only.

This Annual Report is presented in three sections: introductory, financial and statistical. The introductory section contains this transmittal letter, a list of the principal officers of WVCHIP, and WVCHIP's organizational chart. The financial section includes the basic financial statements and footnotes

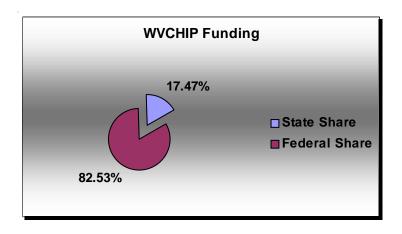

as well as certain supplementary information as required by WV State Code. Also included in the financial section is management's discussion and analysis (MD&A) which provides the reader a narrative introduction, overview and further analysis of the financial information presented. The statistical section includes selected financial and statistical data.

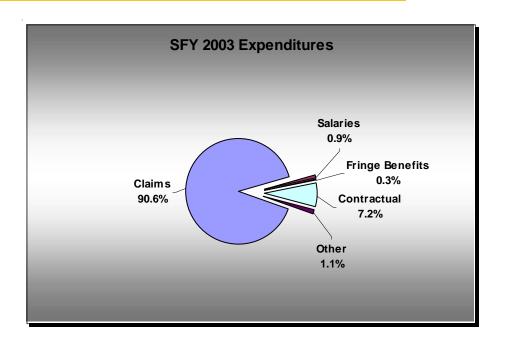

The West Virginia Legislature passed House Bill 4299 on April 19, 1998, to create WVCHIP. Since its inception, it has undergone several changes that include the transfer of the Program from the WV Department of Health and Human Resources to the WV Department of Administration with the passage of Senate Bill 565 in 2000. WVCHIP is governed by a Board of up to eleven members. Day-to-day operations of WVCHIP are managed by the Director who is responsible for the implementation of policies and procedures established by the Board.

FINANCIAL PERFORMANCE AND OUTLOOK

The financial statements of WVCHIP have been prepared on a modified accrual basis of accounting in conformity with generally accepted accounting principles (GAAP) as prescribed or permitted by the Governmental Accounting Standards Board (GASB).

WVCHIP's funding is a shared federal/state partnership. The match rate at June 30, 2003, was 82.53% and 17.47% respectively. WV State Code provides for an actuarial opinion to ensure that WVCHIP's estimated program and administrative costs, including incurred but unreported claims, will not exceed 90 percent of the funding available to the Program. The Actuarial Report dated June 30, 2003, confirmed this through SFY 2005. The report, based on projected funding, enrollment and costs, projected federal funding shortfalls of \$1.5 million, \$22.3 million and \$27.2 million in state fiscal years (SFY) 2006, 2007 and 2008 respectively. Subsequent to this report, additional federal funding was made available that has eliminated the federal shortfall in SFY 2006 and reduced it to \$16.3 million in SFY 2007 and \$21.4 million in SFY 2008. This improvement was a result of a redistribution of federal funds totaling \$18.8 million and an announcement of WVCHIP's federal fiscal year 2004 grant of \$18.7 million. West Virginia was one of 14 states to receive these redistributed funds as a result of spending all of its federal fiscal year (FFY) 2000 funds. Furthermore, WVCHIP spent all of its FFY 2001 funds and expects a comparable redistribution at the beginning of 2004.

CASH MANAGEMENT

Cash and cash equivalents are managed by the West Virginia Investment Management Board. In addition, WVCHIP has funds on deposit with a local financial institution for payment of claims processed by WVCHIP's third-party administrator. Cash in this account remains an asset of WVCHIP until such time as claims are paid.

INITIATIVES

In an effort to reduce costs, WVCHIP has utilized many of the agreements secured through the WV Public Employees Insurance Agency (PEIA). One of these initiatives was to obtain a new pharmacy benefits manager on July 1, 2002. WVCHIP joined PEIA in an innovative multi-state purchasing effort for pharmaceuticals known as RXIS. This effort actually resulted in lower overall prescription drug costs in state fiscal year 2003 than in the previous year.

OTHER

Title XXI of the Social Security Act, enacted in 1997 by the Balanced Budget Act, authorized Federal grants to states for the provision of child health assistance to uninsured, low-income children. The Centers for Medicare and Medicaid Services (CMS) monitors the operation of WVCHIP. Financial statements are presented for the State fiscal year ended June 30, 2003. The federal year ends September 30 and further documentation is submitted to CMS based on that period. Certain statistical information such as HEDIS-type reports, by definition, are presented on a calendar year basis as required.

ACKNOWLEDGMENTS

Special thanks are extended to Governor Bob Wise and to members of the Legislature for their continued support. Gratitude is expressed to the Board members of WVCHIP for their leadership and direction. Finally, this report would not have been possible without the dedication and effort of WVCHIP's Executive Director, Sharon L. Carte. Respectfully, we submit this Annual Report for the West Virginia Children's Health Insurance Program for the year ended June 30, 2003.

Sincerely,

Terry A. Harless, CPA

MANAGEMENT'S DISCUSSION AND ANALYSIS

WEST VIRGINIA CHILDREN'S HEALTH INSURANCE PROGRAM For the Year Ended June 30, 2003

Management of the West Virginia Children-s Health Insurance Program (WVCHIP) provides this Management Discussion and Analysis for readers of WVCHIP-s financial statements. This narrative overview of the financial statements of WVCHIP is for the year ended June 30, 2003. We encourage readers to consider this information in conjunction with the additional information that is furnished in the footnotes which can be found following the financial statements. It should be noted that these financial statements are unaudited and for management purposes only.

This year-s annual report is expanded in comparison to previous annual reports prepared by WVCHIP. This expansion is largely attributed to three considerations: 1) the implementation of new reporting standards in accordance with the Governmental Accounting Standards Board-s (GASB) Statement No. 34 "Basic Financial Statements—and Management-s Discussion and Analysis—for State and Local Governments" and GASB Statement No. 38 "Certain Financial Statement Disclosures" which are two of the most significant changes in the history of governmental accounting; 2) assurance given in a West Virginia Legislative Performance Evaluation and Research Division review to present a report which meets the requirements outlined in State Code; and 3) management's continued awareness of the importance of conveying the activities and results of this Program to readers.

HISTORY AND BACKGROUND

WVCHIP's primary purpose is to provide health insurance coverage to uninsured children in families whose income disqualifies them from coverage available through the Medicaid Program, but is less than twice that of the current Federal Poverty Level (FPL). When Congress amended the Social Security Act in 1997 to create Title XXI "State Children's Health Insurance Program," federal funding was authorized to the states for such programs over a ten year period. The West Virginia Legislature established the legal framework for this State's program in legislation enacted in April 1998. Since then, WVCHIP has undergone several changes of its State Plan to reach its current form. These changes included:

- Phase I: In July 1998, the Program began as a Medicaid expansion by covering children from ages 1 to 5 in households with incomes from 131% FPL to 150% FPL.
- Phase II: On April 1, 2000, coverage for children from ages 6 through 18 in households from 100% to 150% FPL was added. WVCHIP also adopted PEIA=s Preferred Benefit Plan to serve as the benchmark equivalent coverage program.

- In June 2000, WVCHIP notified the federal government that it was withdrawing the Medicaid expansion program and combining it with Phase II to create a separate state program.
- Phase III: In October 2000, WVCHIP expanded coverage for all children between 151% and 200% FPL.
- In June 2002, WVCHIP modified its co-payment requirements for pharmacy benefits to eliminate co-pays for generic drugs and expand co-pay requirements for brand name drugs. It also adopted an annual benefit limit of \$200,000 and a lifetime benefit limit of \$1,000,000.

OVERVIEW OF THE FINANCIAL STATEMENTS

WVCHIP's financial statements have been prepared on a modified accrual basis of accounting in conformity with generally accepted accounting principles (GAAP) as prescribed or permitted by the Governmental Accounting Standards Board. As a governmental fund, WVCHIP is required to present two basic statements in this section as follows:

Balance Sheet: This statement reflects WVCHIP's assets, liabilities and fund balance. Assets equal liabilities plus fund balances. The major line item asset consists primarily of funds due from the federal government to cover WVCHIP's major liability, incurred claims.

Statement of Revenues, Expenditures and Changes in Fund Balances: This statement reflects WVCHIP's operating revenues and expenditures. The major source of revenue is federal grant awards while the major expenditure areas include medical, dental, and prescription drug claims costs.

FINANCIAL HIGHLIGHTS

The following financial statements summarize the financial position and the results of operations for the years ended June 30, 2003 and 2002. (See Pages 12 and 13.)

West Virginia Children's Health Insurance Program Comparative Balance Sheet June 30, 2003 and 2002 (Accrual Basis)

^{*} Other includes therapy, transportation, and durable equip

Unaudited - For Management Purposes Only - Unaudited

- Total assets have increased approximately \$525,000 in comparison to the previous year end amount. This increase resulted primarily from federal funds receivable pertaining to outstanding claims and administrative reimbursements due.
- Total liabilities have increased by approximately \$518,000 during the year.
- Total fund balance increased approximately \$7,500 in comparison to the previous year end amount.
- Total operating revenues increased approximately \$532,000.
- Medical, dental and prescription drug expenditures comprise approximately 90% of WVCHIP's total costs. These expenditures increased approximately \$499,000 over the prior year representing an increase of 1.7%.
- Administrative costs accounted for 10% of overall expenditures. These expenditures increased approximately \$113,000 representing an increase of 1.9%.

A net increase in medical, dental and prescription drug claims costs of 1.7% is particularly encouraging considering the rate of medical care inflation, nationally, continues to run higher than the overall inflation rate. Moreover, WVCHIP-s enrollment increased by 6% over the year. This enrollment trend was continual from 20,585 enrollees on July 1 to 21,797 enrollees on June 30 for an increase of 1,212 participants. Phase III participants, that is, enrollees in households with incomes between 151% and 200% FPL are the smaller of the two groups, but constituted the faster growing group. Favorable trends in claims costs are due to efficiencies gained through a new pharmacy benefit manager and through an innovative multi-state effort known as RXIS. WVCHIP has also experienced the passing of "pent up" demands for services. These pent up costs are illustrated in Table 13 on page 43 in the Statistical Section. All told, the combination of the above has resulted in a 3% lower annual cost per child at June 30, 2003, of \$1,369 than in June 30, 2002.

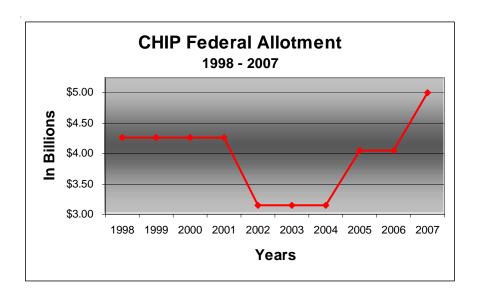

MAJOR INITIATIVES

Title XXI of the Social Security Act allows—even encourages—SCHIP=s flexibility and creativity to formulate certain aspects of individual programs. As noted, WVCHIP obtained a new pharmacy benefit manager on July 1, 2002, as part of a multi-state program effort administered by the PEIA. A new co-payment structure was enacted which favors the use of generic drugs over brand name drugs. Certain brand name drugs listed on a preferred drug list also carry a lower co-pay than non-listed brand name drugs. While federal guidelines limit the co-pay amount that can be charged to families below a certain level of income, this change has resulted in savings to the Program.

A major Program enhancement to access children's coverage was made available this year through West Virginia's inROADS Project (www.wvinroads.org). This is an online interactive application process that allows anyone to apply for children's coverage through WVCHIP or the Medicaid program. Applications are available for processing through the electronic eligibility system operated by the West Virginia Department of Health and Human Resources (WVDHHR). The inROADS Project was a major initiative of WVDHHR, allowing 21st century technology to enhance the ability of the general public and health service partners such as primary care clinics and hospitals to access health care coverage for uninsured children.

WVCHIP remains cognizant of the importance of maximizing federal dollars. This past year, WVCHIP was one of only 14 states to receive a redistribution of federal fiscal year (FFY) 2000 funds from a pool of money that was returned to the federal government by states that otherwise forfeited a portion of their grant awards. These additional funds amounted to \$18.8 million. By utilizing all of its

FFY 2001 original allocation within the allotted time period, WVCHIP was assured that it will again receive redistributed funds in the coming federal fiscal year. Finally, WVCHIP anticipates that its federal allotments will increase in FFY 2005 and beyond as the overall federal SCHIP allotment increases as illustrated below:

The availability of FFY 2000 redistributed funds in the last quarter of SFY 2003 made possible another initiative this year - the Prevention Summer 2003 Campaign - to help families assure that children received preventive medical, dental, and visual check-ups over the summer and as the school year starts. This effort involved publicizing prevention check-ups to the provider community and WVCHIP families. A comparative analysis of the cost and utilization of prevention services for this period will be made with an earlier period in which no campaign measures took place. A report of this analysis at the end of calendar year 2003 will help assess the impact of the campaign.

CONTACTING WVCHIP'S MANAGEMENT

This report is designed to provide our enrollees, citizens, governing officials and legislators with a general overview of WVCHIP-s finances and accountability. If you have questions about this report or need additional information, contact WVCHIP's Financial Officer at 304-558-1673. General information can also be obtained through our website at http://www.wvchip.org.

West Virginia Children's Health Insurance Program Notes to Financial Statements For the Year Ended June 30, 2003

Note 1

Summary of Significant Accounting Policies

Basis of Presentation

The accompanying general purpose financial statements of the West Virginia Children's Health Insurance Program (WVCHIP) conform to generally accepted accounting principles (GAAP) for governments. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for governmental accounting and financial reporting.

Financial Reporting Entity

The West Virginia Children's Health Insurance Program (WVCHIP) expands access to health services for eligible children. Major revenue sources are federal awards and state appropriations. WVCHIP uses third party administrators to process claims, pay providers, and review utilization of health services. A tenmember board develops plans for health insurance specific to the needs of children and to develop annual financial plans which promote fiscal stability.

Basis of Accounting

WVCHIP follows the modified accrual basis of accounting. Revenues are recognized when they become both measurable and available. Significant revenues subject to accrual are federal awards. Expenditures are recognized when a related liability is incurred.

Assets and Liabilities

Cash and Cash Equivalents

Cash equivalents principally consist of amounts on deposit in the State Treasurer's Office (STO) that are pooled funds managed by the West Virginia Investments Management Board (IMB). In addition, WVCHIP makes interest-earning deposits in certain investment pools maintained by IMB that are available to WVCHIP with overnight notice. Interest income from these investments is prorated to WVCHIP at rates specified by IMB based on the balance of WVCHIP's deposits maintained in relation to the total deposits of all state agencies participating in the pool. The carrying value of the deposits reflected in the financial statements approximates fair value. WVCHIP also has an outside bank account which it utilizes to make provider payments. Cash deposits in the outside bank account are considered to be cash and cash equivalents and are generally carried at fair value.

Deferred Revenue

Receipts to reimburse for program expenditures to be incurred in the future periods are classified as deferred revenue.

Insurance Claims Payable

The liability for unpaid claims is based on an estimate of claims incurred but not yet reported as of the balance sheet date. Offsetting amounts receivable for the federal and state share of these expenditures have been recorded.

Note 2

Cash and Investments

At June 30, 2003, information concerning the amount of deposits with financial institutions, including deposits, of the State Treasurer's Office is as follows:

	Carrying Amount	Bank Balance	Collateralized Amount
Deposits with Treasurer Deposits with third	\$ 1,138,399		
party administrators	(131,441)	3,079	3,079

Claims payable, beginning of year	\$3,210,000
Incurred claims expense	29,206,126
Payments: Claim payments for current year Claim payments for prior year Claims payable, year to date	21,713,320 7,802,806 \$2,900,000

Note 5

Contingencies

WVCHIP receives significant financial assistance from the U.S. Government in the form of grants and other federal financial assistance. Entitlement to those resources is generally conditioned upon compliance with the terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of the resources for allowable purposes. Federal financial assistance awards are subject to financial and compliance audits under either the federal Single Audit Act or by grantor agencies of the federal government or their designees. Any obligations that may arise from cost disallowance or sanctions as a result of those audits are not expected to be material to the financial statements of WVCHIP.

REQUIRED SUPPLEMENTARY INFORMATION

- "Thank you for a great program to help WV's children."
- > "The CHIP Program is an awesome program and I don't know what I'd do without it."
- > "They [the family's children] never had a dentist until CHIPs."
- > "I'm so pleased to have this for my son, because my husband's work has been cut to four days a week and it would be really hard on us if I had to pay for doctor visits and such. Thank you."

Comments from four WVCHIP families from the Customer Satisfaction Survey 2003.

West Virginia Children's Health Insurance Program Report of Independent Actuary June 30, 2003 Quarterly Report

OVERVIEW

CCRC Actuaries, LLC ("CCRC Actuaries") was engaged by The West Virginia Children's Health Insurance Program ("CHIP Program") to assist the West Virginia CHIP Board in the analysis of actual and projected plan experience in the current state fiscal year 2003 ("FY 2003") through fiscal year 2008 ("FY 2008"). West Virginia legislation requires that an actuary provide a written opinion that all estimated program and administrative costs of the agency under the plan, including incurred but unreported claims, will not exceed 90 percent of the funding available to the Program for the fiscal year for which the plan is proposed. Based on the Baseline Scenario, the Program costs are not expected to exceed 90 percent of the funding available to the Program through State Fiscal Year 2005. Note that we are currently projecting a Federal funding shortfall of \$1,515,000 in Fiscal Year 2006 based on the current assumptions.

This projection reflects the availability of Federal funding from FY 2000 Redistribution amounts as shown in Appendix A. West Virginia was one of 16 states that received this funding. While a total of \$18,804,528 was made available for West Virginia CHIP, conditions set by the federal government will result in a lower amount of the funding being spent. The Redistribution amount must be spent by 9/30/2003 and spent only after the 2001 Federal Funding amount has been spent. As of June 30, 2003, WV CHIP management has started the draws from the redistribution account. WV CHIP management estimates that approximately \$6.5 million of the monies will be spent. Note that the funds are expected to be spent in State Fiscal Year 2004 in the months of July through September based on current projections.

Overall enrollment for the CHIP Program in FY 2003 has increased slightly from FY 2002 levels. The current program enrollment as of June 2003 consists of 14,243 children as part of Phase II that consists of children whose families are below 150% of the federal poverty level and 7,554 children as part of Phase III that consists of children whose families are between 150% and 200% of the federal poverty level. Phase III children are required to make copayments as part of the benefit structure of the program. Since the March 31, 2003 Quarterly Report, overall enrollment has increased by 495 children from March 2003 to June 2003, while Phase II had an increased enrollment of 241 children, and Phase III had an increased enrollment of 254 children.

The monitoring and analysis of claim trends is critical to the accurate forecast of future costs of the Program. The analysis of claims has become more critical with the Phase III expansion beginning in October 2000. Current claim trend experience has been financially favorable. Financial results continue to indicate that this group had, at least initially, significantly higher health care utilization than families under 150%. More recent experience has indicated after the initial enrollment period the two eligibility groups have similar health care statuses. Therefore, we have based our projections on the average projected health care costs of both eligibility groups.

Under the State Fiscal Year basis, we are now projecting that incurred claim costs under the Baseline scenario assumptions for FY 2003 will be \$28,078,910 compared to the previous projection of \$27,908,611 contained in the March 31, 2003 Quarterly Report. The updated projection for FY 2004 claims is \$32,276,248 compared to the prior projection of \$31,492,142. These increased costs are the result of the recent enrollment growth and higher paid claims experience in April 2003 through June 2003 in the CHIP program.

PLAN ENROLLMENT

We have updated our projection based on the actual enrollment through June 2003. Current enrollment has gone up because Phase II and Phase III enrollments continue to increase. The Program had enrollment at the end of Fiscal Year 2002 of 20,585 children, with 14,208 under Phase II and 6,377 under Phase III. Current enrollment as of June 2003 is 21,797 children, with 14,243 under Phase II and 7,554 under Phase III.

The following chart summarizes the enrollment information using end of month enrollment information by Phase II and Phase III and in total:

Date	Phase II	Phase III	<u>Total</u>	Date	Phase II	Phase III	<u>Total</u>
Jul-00	10,349	0	11,839	July-02	14,208	6,377	20,585

June-02	14,030	6,013	20,043				

2003 Annual Report

The Baseline program enrollment assumptions are summarized in the following chart. Note that the long-term enrollment has increased by 75 additional children from March 2003 to June 2003.

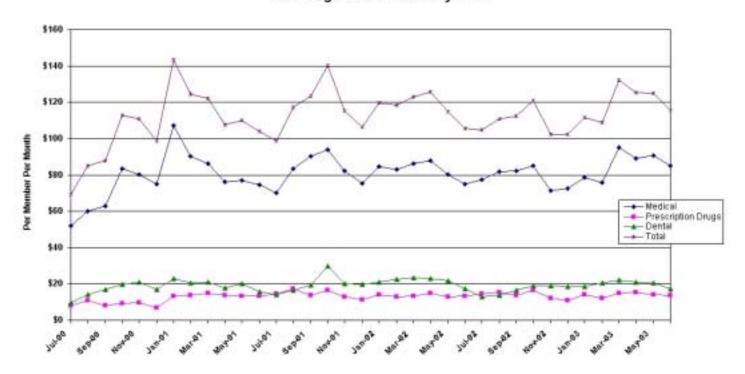

Scenario	FY2003	FY2004
State - Baseline	21,222	21,797

CLAIM COST AND TREND ANALYSIS

We have continued to utilize the trend assumptions from the March 31, 2003 Quarterly Report. These trends are 10% for Medical and Dental Claims and 21% for Prescription Drug Claims. Note that the 2003 Prescription Drug trend was reduced by approximately 7% based on expected savings from RXIS. The WV CHIP program has actually experienced negative trends because of a variety of reasons including the RXIS initiative, reductions in Hospital reimbursement, and lower ultimate cost of care once initial enrollment periods have elapsed. Comparing the FY 2003 period of July through June to FY 2002, Medical trends have been -1%, Dental trends have been 0%, and Prescription Drug trends have been -12% on a per member per month basis. While most recent experience continues to be favorable, we have maintained the current trend assumptions in this report.

The following chart summarizes incurred claims on a per member per month ("PMPM") basis for the major categories of medical, dental and prescription drugs based on information received through June 2003.

West Virginia CHIP - Monthly Cost

FINANCIAL PROJECTION - STATE FISCAL YEARS 2003-2008

The updated incurred claims for FY 2003 is projected to be \$28,353,910 based on expected enrollment of 21,222 children and projected incurred claim per member per month cost data assumption of \$111.34, as summarized in the following chart. In the March 31, 2003 Quarterly Report, the incurred claims for FY 2003 were projected to be \$28,183,611 based on expected enrollment of 21,147 children and projected incurred claim per member per month cost data assumption of \$111.06.

Category	Incurred Claims	Per Member Per Month	Prior Report Projection Per Member Per Month
Medical	\$20,131,828	\$79.05	\$78.32
Prescription Drugs	4,670,112	18.34	19.54
<u>Dental</u>	3,551,970	<u>13.95</u>	13.20
Total	\$28,353,910	\$111.34	\$111.06

The financial forecast for the State Fiscal Years 2003 through 2008 can be found in Appendix A. We are forecasting adequacy in aggregate through FY 2005 and projecting that under either scenario, the Program will need additional Federal funding beginning in FY 2006.

Appendix A contains a five-year projection period as requested by CHIP management similar to the previous report. The first section of the report is the beginning balances of both Federal and State funding sources. The middle section of the report projects and reports on incurred claim, paid claim and administrative expenses, as well as expected Interest earnings and accrued prescription drug rebates. This section also projects federal and state shares of paid expenses, as well as incurred but not received ("IBNR") claim liabilities. The last section of the report projects the ending balances of both Federal and State funding sources.

Based on the assumptions developed, we are projecting a shortfall in Federal Funding of \$1,515,000 in SFY 2006, \$22,334,000 in SFY 2007, and \$27,209,000 in SFY 2008, compared to the previous projection of Federal funding deficits of \$20,957,000 in SFY 2007. We are not projecting a shortfall in State funding based on funding levels provided by CHIP management. It should be noted that the Federal Government has not provided projections of expected federal funding in the final years of the projection and these estimates are subject to change.

It should be noted that we included \$6,514,637 Federal Funding in FY 2003 and \$6,500,000 Federal Funding in FY 2004 to reflect limited redistribution for Federal FY 2000 Funds. Additionally, we are currently projecting FY 2003 drug rebates will be \$275,000. Through June 30, 2003, \$125,571 has been received. We continue to anticipate that the reconciliation of the drug rebate will result in the full \$275,000 being realized.

STATEMENT OF ACTUARIAL OPINION

I, Dave Bond, Managing Partner of CCRC Actuaries, LLC hereby certify that I am a Fellow of the Society of Actuaries and a Member of the American Academy of Actuaries. I meet the actuarial qualification standards to render Statements of Actuarial Opinion for Children Health Insurance Programs and other self-insured entities. I have been retained by CHIP to render a Statement of Actuarial Opinion regarding the methods and underlying assumptions developed and used in this analysis.

This Statement of Actuarial Opinion was prepared in a manner consistent with the Code of Professional Conduct and Qualification Standards of the American Academy of Actuaries, and the Standards of Practice of the Actuarial Standards Board.

In my opinion, all estimated program and administrative costs of the agency under the plan, including incurred but unreported claims, will not exceed 90 percent of the funding available to the Program for the fiscal year for which the plan is proposed through State Fiscal Year 2005.

It should be noted that this opinion is based on State Funding levels as illustrated in Appendix A and FY 2005 through FY 2008 have not been appropriated by the Legislators.

OUTREACH

A Continuing Community Partnership

WVCHIP has worked closely with all partners and entities identified in its State Plan, however, the West Virginia Healthy Kids and Families Coalition has played a pivotal role in working with community based partners to reach uninsured children across the State of West Virginia. The Coalition is a key participant in the Robert Woods Johnson Foundation's "Covering Kids Project." This year's collaborations included media campaigns and community outreach grants in targeted counties. During the summer months alone, over 100 community events were held featuring WVCHIP promotion or outreach in some form throughout West Virginia in an effort to increase enrollment and awareness of the program.

A Targeted Approach

Based on survey data from "Health Insurance in West Virginia," WVCHIP was able to prioritize outreach efforts to fifteen (15) counties (shown on page 29) of the State with either higher numbers or percentages of uninsured children. The impact of these efforts can be seen in the Statistical Section in Tables 9 and 10 (shown on pages 40 - 41).

A School-Based Emphasis

Studies prove that children without health insurance tend to be ill more often and, subsequently, are absent from school more often than their peers that do have health insurance. For this reason, WVCHIP finds it essential to collaborate with school nurses and the county school districts in an effort to educate and support families in obtaining health care coverage.

In 2002-2003, WVCHIP scheduled meetings with school nurses in the targeted fifteen counties that had higher numbers of uninsured children. WVCHIP used these meetings to discuss program eligibility and solicit ideas from school nurses in reaching uninsured children in their respective counties.

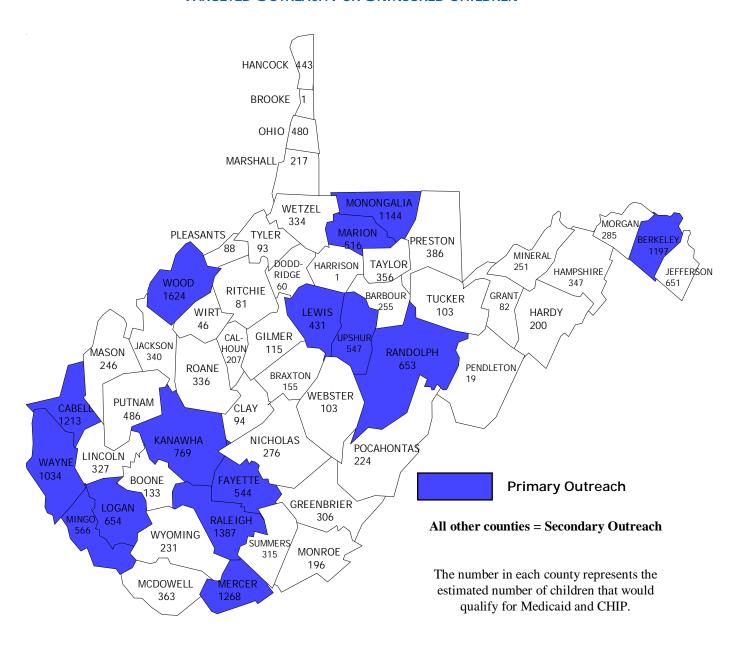

The following recommendations from school nurses were implemented in fiscal year 2002:

- Letters were sent to school principals identifying "Simple Ways Schools Can Help Enroll Children in WVCHIP" and offering outreach assistance.
- · A WVCHIP flyer was sent home to students through report card mailings.
- · The WVCHIP toll-free helpline number was printed in several parent handbooks.
- · Information about WVCHIP was included in Back-to-School packets.

Prevention Summer 2003 Campaign

WVCHIP implemented a prevention campaign targeting providers and current plan members in June 2003. The campaign's goal was to educate members about the importance of utilizing prevention services, such as well-child visits, immunizations, vision and dental care. With additional federal funding available during this quarter, WVCHIP was able to offer higher reimbursement rates to providers temporarily for the period of the prevention campaign to encourage provider participation and to increase prevention check-ups. An analysis of the cost and utilization of these prevention services during this quarter will be compared to those in a previous quarter when no campaign measures were in effect. This comparative analysis is expected to be completed at the end of calendar year 2003.

TARGETED OUTREACH FOR UNINSURED CHILDREN

(Chart developed by the WVCHIP for outreach purposes based on data from "Health Insurance in West Virginia:

The Children's Report" - a survey by The Institute for Health Policy Research at the

West Virginia University Robert C. Byrd Science Center)

CUSTOMER SATISFACTION SURVEY 2003 SUMMARY

METHODOLOGY

There were 910 questionnaires, accompanied by a letter from the Executive Director, mailed in October 2003. This first mailing was followed by a "reminder" postcard mailed two weeks later. A second copy of the survey was mailed to non-respondents approximately three weeks following the postcard mailing.

Survey Response Rate

The survey response rate was 62.5% with a total of 569 surveys returned.

Time Enrolled

The greatest number, 38.3%, responded their children had been on the Program for 1 to 2 years, 27.2% for less than one year, and 34.1% for more than 2 years.

Health Status

Over three quarters, 78.8%, of survey respondents rated their child's health as "Very Good" or "Excellent," 17.4% as "Good," and 3.7% as only "Fair" or "Poor."

Medical Home

Regular Family Doctor Upon Enrollment

73.1% of children did have a regular family doctor prior to enrolling in the Program, and 26.2% of children did not have a regular family doctor before they enrolled in the Program.

Family Doctor Change After Enrollment

Of those children who did have a family doctor prior to their enrollment in the Program, only 3.3% had to change physicians once they had enrolled.

Changed Doctor

About 10% of respondents changed doctors because they were dissatisfied with care since they enrolled in the Program.

Harder Or Easier To See Doctor

Only one respondent, .2%, reported that it was harder to see a doctor since enrolling their child in the Program, 23.7% reported that it was easier, and 75.6% said it was about the same.

Travel Time To Doctor

50% of respondents travel less than 10 miles to see a doctor, over 20% of respondents travel more than 20 miles to see a doctor, and approximately the same percent (over 20%) travel less than 5 miles to see a doctor.

Customer Satisfaction Survey 2003 Summary (Continued)

Medical Home

Respect Shown By Doctor And Staff

80% of respondents reported they are always treated with respect by their child's doctor and his/her staff, and another 19% report that this is usually the case.

Specialist Referral

61.6% of the respondents felt their child should see a specialist, 52.8% (of the 61.6%) received a referral "Every Time," and 8% (of the 61.6%) received a referral "Sometimes."

Rating Quality of Doctor Care

Almost 90% (89.6%) of respondents rated the care their child received from the doctor as "Very Good" or "Excellent."

Preventive Care

Preventive Care Doctor Visits

80% of respondents reported making one or more visits to the doctor's office for preventive care.

Dental Care Visits

A little over two-thirds, 67.5%, of respondents reported using the WVCHIP insurance card for dental services, and 63.1% (of the 67.5%) were for check-ups and cleaning only.

SATISFACTION WITH WVCHIP

Quality Of Care Change

57.1% of respondents felt the quality of care their child received improved after enrolling in the Program. 46% reported they were "Much Better Off Now"

10.6% reported they were "Somewhat Better Off"

41.1% reported they were "About The Same"

1.4% reported they were "Somewhat Worse Off"

Overall Satisfaction

75% reported they were "Very Satisfied" overall with WVCHIP 24% reported they were "Satisfied" overall with WVCHIP

STATISTICAL SECTION

"School nurses are thrilled with the Program. It's very frustrating to be in a helping profession and have nowhere to refer children with health problems. Since WVCHIP, all that has changed."

> Brenda Isaac, RN Head School Nurse, Kanawha County

All statistics are for the fiscal year ended June 30, 2003, unless noted otherwise.

The Health Plan Employer Data and Information Set (HEDIS®) - Type Data as Utilized By WVCHIP

HEDIS® is a set of standardized performance measures designed to ensure that purchasers and consumers have the information they need to reliably compare the performance of managed health care plans. However, many states are using HEDIS to assess services delivered to both Medicaid and State Children's Health Insurance Program (SCHIP) beneficiaries to monitor program performance. Typically, the performance measures in HEDIS are related to many significant public health issues for adults such as cancer, heart disease, smoking, asthma and diabetes. Child health measures may include preventive and well child visits, immunization status, access to primary care practitioners, dental visits and can include selected chronic conditions.

WVCHIP is utilizing HEDIS-type measures that identify only those individuals with 12 months of enrollment whose treatment information can be included in calculations of measures assessing the level of services extracted from claims payment in a fee-for-service environment. For HEDIS measures involving services or treatments delivered in set time frames (e.g., preventive services, screenings, well-care visits), managed care plan members must be enrolled for a minimum of 12 months, with no more than one break of 45 days, to be included in the calculation of the HEDIS rate. For other measures, the required period of continuous enrollment varies. HEDIS is sponsored, supported and maintained by the National Committee for Quality Assurance.

The following tables present HEDIS results for WVCHIP enrollees during calendar year 2002 (See Tables 14-18):

HEDIS-Type Data January 1, 2002 to December 31, 2002

TABLE 14: DENTAL VISITS

Total	2,944	2,636	89.54%	

HEDIS-Type Data January 1, 2002 to December 31, 2002

TABLE 18: IMMUNIZATIONS

Note: Combination 1 = 4 DTaP/DT, 3IPV/OPV, 1 MMR, 3HiB, and 3 HEPb

Combination 2 = Combination 1 plus 1 VZV

Because of the low likelihood of a child being enrolled in WVCHIP from birth on, it is highly unlikely that a child will have the entire course of immunizations while enrolled in WVCHIP.

Key

DTaP/DT = Diphtheria, Tetanus, Pertussis

IPV/OPV = Inactivated/Oral Polio Vaccine

MMR = Measles, Mumps, Rubella

HiB = Haemophilus influenzae Type b

HEPb = Hepatitis B

VZV = Varicella-Zoster Virus

SELECTED UTILIZATION DATA AS HEALTH STATUS INDICATORS

WVCHIP currently operates exclusively in a fee-for-service payment structure. The data in Tables 14 - 18 reflect preventive services as extracted from claims payments. The selected preventive services are:

- > Vision
- Dental
- ➤ Well Child Visits
- > Access to Primary Care
- > Immunizations

Unlike the HEDIS®-type preceding data in Tables 14 - 18, the health status indicator data reflects services for all WVCHIP enrollees whether they are enrolled for one month or twelve months in the annual measurement period. Also, it captures more specific data for the entire population, which may not be captured in a HEDIS measure. (e.g. the HEDIS child immunization measure is specific to a required combined set of several immunizations over a two year period for two year-olds resulting in a "0" measure, whereas the selected immunization data reflects more detail.)

The advantage of having separate HEDIS-type measures is to allow comparison among managed health care plans, and with other states' CHIP or Medicaid programs.
